Welcome

My brain is only a receiver, in the Universe there is a core from which we obtain knowledge, strength and inspiration. I have not penetrated into the secrets of this core, but I know that it exists.

Did you get IRB approval for your human subject research project?

No, the IRB was taking too long, so I went ahead and started collecting data...

AWS vs. Azure vs. Google

In comparison to Google Cloud Platform vs AWS vs Microsoft Azure, Pricing is the key factor to look upon. Google Cloud Platform provides 12-month free trial service. After this period, a user can quit all the services if not required or can update if he/she wants to change the current plan. But in other platforms, Pricing is a bit high.

Query Facebook Data – Max Common Friends

Python Code:

```
print("get common friends")
# c = common friend of a and b
commonf = g.find("(a)-[]->(b); (b)-[]->(c); (a)-[]->(c)").select(F.col("a.id").alias("a"),\
    F.col("b.id").alias("b"),F.col("c.id").alias("common"))
commonf = commonf.groupBy("a","b").count()
commonf = commonf.groupBy("a").agg(F.max("count")).orderBy("a")
sqlContext.clearCache()
commonf.show(30)
```

Result:

Max Common Friends for Each Person ID

Query Facebook Data – Histogram

Python Code:

```
import matplotlib
import matplotlib.pyplot as plt
pd = commonf.toPandas()
pd[['max(count)']].plot(kind='hist', bins=200, fontsize=15,
                        xlim=(0,180), ylim=(0,650), width=1, figsize=(20,5))
plt.title("Common Friends Plot", fontsize=15)
plt.xlabel('max common friends', fontsize=15)
plt.ylabel('count', fontsize=15)
plt.savefig('output12.png', dpi=500)
